

DARKNESS, AND ITS ONLY CURE

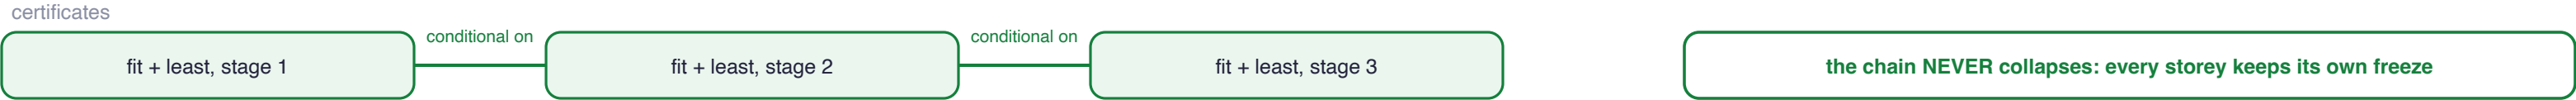

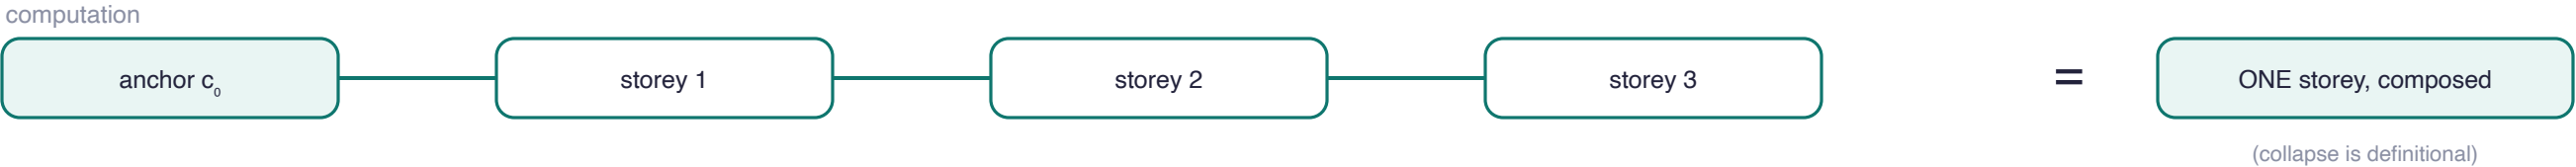

two DIFFERENT objects, identical under every read in the family: dark.
darkness is destroyed exactly by enlarging the family; no amount of repetition inside it helps.
on the causal store of page three, the family is observation and the enlarging read is an intervention.

WHAT NO FINITE VIEW DECIDES, A PATTERN OF VIEWS CAPTURES

no single finite view decides it; a countable union of countable intersections of finite views captures it exactly. Hardness and definability, located together.

FLAT WHERE IT COMPUTES, STACKED WHERE IT CERTIFIES

ask of any layered system: what collapses, and what stacks. Here: the decode collapses (depth is free for computing), the certificate chain stacks (depth is real exactly for trust). The price compounds per storey.
